REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The prior art has established that it is old and well known to use position bristles or tines fixed within a brush head which is positioned to sweep the bottom of a container in order to clean unwanted debris from the container, or to mix food products, see examples to Blanchat 893714 or Damrow 2488053 or Hall 902,577. However, the claims distinguish over the prior art whereby, in the art of dissolution of pharmaceutical product, the method requires inventive steps of at least, providing a rotation with repeated biasing of the brush body in engagement with the bottom portion of the vessel, and a cooperative step of dispersing solid particles of pharmaceutical product on the bottom portion of the vessel. In review of the prior art, it has been determined by the Examiner that, absent impermissible hindsight, there is now showing or motivation to modify the method provided by the prior art in combination with a dissolution of pharmaceutical product, and/or furthermore provide a repeated biasing of the brush body to sweep the bottom portion of the vessel.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
